A software engineer with over 3 years of experience in a competitive IT industry. Results-oriented and deadline-focused professional with esteemed ability to provide effective, efficient, and timely solutions.

PROFESSIONAL EXPERIENCE

Betable   *Edmonton, Canada*
Software Developer - Go, NodeJS, ReactJS   Feb 2023 – Present

- Member of the payment integration team that is responsible for integrating payment processors, coordinating transactions between wallets and accounting services, and ensuring compliance for pre and post transactions.
- Played a key role in ensuring PCI compliance by implementing data and key encryption rollover techniques for credit card transactions, and redacting sensitive data for users within the PCI DSS environment.
- Developed an aliasing solution using 1-way encryption to anonymize user payment instruments, ensuring consistent encrypted outputs for enhanced data protection and significant privacy improvements.
- Contributed to integrating Total Processing and Paysafe payment processors, developing the payouts component, and enhancing payment operations including pre-authorization, capture, and cancellation.
- Implemented SEON for BIN lookups to enhance user payment instrument metadata to improve fraud detection and secure transactions.
- Supported enhancements to Gateway APIs (GAPI) and Service APIs (SAPI), improving data exchange efficiency between microservices and enabling scalable integration with external clients.
- Led the development of player support application, implementing core features such as login, authentication, search, and financial transactions (deposits and withdrawals). Integrated seamlessly with existing backend endpoints.

iSell Philippines Inc   *Cebu, Philippines*
Junior Full Stack Web Developer - PHP, Laravel, ReactJS   Jan 2017 – Jun 2019

- Developed system features in import, export, and migration
  - Used by 120 suppliers to convey 50 million products to their catalog management system
  - Incorporated suppliers' price feeds for them to generate more business and turn quotes into cash
- Enhanced CRM, product catalog, and e-commerce systems' performance by incorporating ElasticSearch for a fast look-up on users, accounts, products, quotes, orders, and invoices
- Integrated Autotask and ConnectWise system to the Configure Price Quote system
- Developed a Single Page Application featuring CRUD modules, customizable settings, and custom order/quote templates for enhanced user experience

SKILLS

Programming Languages – Go, C++, C#, PHP(Laravel), Javascript(NodeJS, ReactJS, NextJS)
Tools – Git, ClickUp, SQL, NoSQL
Practices – Agile/Scrum, Code reviews, Testing
